

## **Accelr8 to Receive Award for ICAAC Presentation**

Accelr8 to Receive Award for ICAAC Presentation The presentation title is "Same-Shift ID Directly from Respiratory Specimens by Automated Microscopy." It will report results from a study using Accelr8's BACcel®8482 rapid diagnostic system in collaboration with investigators at the Barnes-Jewish Hospital in St. Louis. Accelr8 will announce the study results at the time of the presentation. ICAAC (www.icaac.org) is the annual Interscience Conference on Antimicrobial Agents and Chemotherapy. Organized by the American Society for Microbiology (www.asm.org), ICAAC is a major global congress for Clinical Microbiology and Infectious Diseases Medicine. In additional news, Accelr8 received notice of issuance for a Japanese patent on the BACcel®8482 system. The new patent joins previously issued US and international patents to broaden Accelr8's global patent coverage for the BACcel®8482 system. According to David Howson, Accelr8's president, "we are honored by the recognition from ICAAC's review committee. It reflects the BACcel®8482 system's potential importance in Clinical Microbiology. Our culture-free methods have repeatedly demonstrated the unprecedented ability to quantitatively identify multiple pathogens directly from patient specimens in less than 2 hours. Our pilot clinical studies pass the 'real specimen' hurdle that continues to stymie new attempts to replace multi-day culturing. The BACcel®8482 system continues to widen its lead in helping to fight the worsening global antibiotic resistance pandemic." About Accelr8 Accelr8 Technology Corporation (www.accelr8.com) is a developer of innovative materials and instrumentation for advanced applications in medical instrumentation, basic research, drug discovery, and bio-detection. Accelr8 is developing a rapid analytical platform for infectious pathogens, the BACcel®8482 system, based on its innovative surface coatings, assay processing, and detection technologies. In addition, Accelr8 licenses certain of its proprietary technology for use in applications outside of Accelr8's own products.
